

**Hybrid position, after training, coming to the Orlando office once a week for a weekly meeting. Full-time position with benefits. Salary range: \$45,000 to \$50,000, with an opportunity for an annual bonus for meeting objectives**

Job Title: Entry-Level IT Professional / Junior Web Developer

Location: [Your Location] – On-site preferred

Job Type: Full-time

Company Size: ~10 Employees

### **About Us**

We're a small but growing eCommerce business in the automotive parts space. With a team of about 10 people, we depend on well-built internal tools and efficient processes to manage our online sales and operations. We're looking for an entry-level IT professional to help support and improve the custom software that keeps our business running day to day.

### **What You'll Do**

You'll work closely with our IT team, operations staff, and a remote development group to maintain and improve a custom-built web application that integrates with multiple SaaS platforms. This role is a great opportunity for someone looking to gain hands-on experience across the full software development lifecycle in a real-world production environment.

### **Responsibilities:**

- Make small updates and improvements to our internal web application (built with Ruby on Rails)
- Help resolve technical issues and support daily operations
- Communicate effectively with both technical and non-technical team members
- Collaborate with an overseas development team to manage ongoing improvements
- Work with APIs to integrate third-party SaaS tools
- Assist in reviewing and improving database design and performance
- Completing projects on time and on budget
- Managing projects with Asana

### **What We're Looking For**

Required:

- Degree in Computer Science, Information Systems, or related field (or equivalent experience)
- Experience with web development (Ruby on Rails preferred, but not required)
- Familiarity with relational databases and basic database design
- Strong communication and problem-solving skills
- Ability to work independently and learn quickly

### **Nice to Have:**

- Experience with Ruby on Rails
- Exposure to SaaS application integrations via APIs
- Understanding of database design principles
- Interest in eCommerce or logistics systems
- Experience with ShipStation, Suredone, and/or SkuVault
